APPLIED MATHEMATICS AND COMPUTATION

VOLUME 23 1987

V. Lakshmikantham and S. Sivasundaram
The Method of Upper and Lower Solutions and Interval Method for First Order Differential Equations 1

Feng-Cheng Chang
Power-Series Unification and Reversion 7

Zi-Ping Luo and Herschel Rabitz
Expected Value Analysis: Experimental Considerations and Convergence Properties 25

G. Adomian and R. Rach
Explicit Solutions for Differential Equations 49

I. M. Longman
The Summation of Fourier, Chebyshev, and Legendre Series 61

Richard F. Deckro and Thoms M. Gunther
Drilling Strategies for Frontier Areas 71

Harriet H. Kagiwada, Robert E. Kalaba, and Melvin R. Scott
The b and h Functions for Integral Equations with Displacement Kernels: A Computational Method and an Application to Radiative Transfer 93

Seymour V. Parter
Remarks on Multigrid Convergence Theorems 103

Michal Kočvara and Jan Mandel
A Multigrid Method for Three-Dimensional Elasticity and Algebraic Convergence Estimates 121

J. Casti
Singularity Theory for Nonlinear Optimization Problems 137

Masanori Sugisaka
The Design of A Linear Regulator Based on an Integral-Equation Representation 163

Ching-Lung Chang and Max D. Gunzberger
A Finite Element Method for First Order Elliptic Systems in Three Dimensions 171

John D. Miller
Finding Roots of Equations in Given Neighborhoods 185

Yevgeny Zeldin
Topological Analysis of Large Networks 193

K. L. Kuttler and D. L. Hicks
Some Progress on the Hydrocode Convergence Problem 211

V. Lakshmikantham and A. S. Vatsala
Method of Mixed Monotony for Nonlinear Equations with a Singular Linear Part 235

Robert Kalaba, Thomas Plum, and Leigh Tesfatsion
Automation of Nested Matrix and Derivative Operations 243

Zang Zhu-Quan
A Note on the Theorem of Lakshmikantham and Leela 269

Guo-Rong Wang
A Finite Algorithm for Computing the Weighted Moore-Penrose Inverse A^{+}_{MN} 277

Bruce R. Feiring
Some Properties of the Solution Space of the *N*-City Traveling-Salesman Problem 291

S. Marsili-Libelli and M. Castelli
An Adaptive Search Algorithm for Numerical Optimization 341

Yang Haigang
Defect-Correction Multigrid Methods for Nonlinear Problems 359
